

Healthy Climate®

Indoor Air Quality Systems

Ventilation Control System

An efficient, economical way to freshen the air in your home

Healthy Climate[®] Ventilation Control System

Whole-home ventilation for improved air quality and comfort

Automatic monitoring of outdoor temperature and indoor humidity

Compatible with any forced-air system (installs on the return side of the unit's duct system)

Meets ASHRAE* 62.2-2003 ventilation standard; ventilation is a key strategy for improving indoor air quality

WARRANTY**

2-year limited warranty.

*American Society of Heating, Refrigerating and Air Conditioning Engineers

**Applies to residential applications only. See actual warranty certificate for details.

AN EFFICIENT, ECONOMICAL WAY TO FRESHEN THE AIR

The Healthy Climate[®] ventilation control system brings the right amount of fresh air into your home, at the right time. This results in improved comfort, air quality and efficiency.

Comfort Makes sure the air coming into your home is not too humid, hot or cold.

Air Quality Introduces fresh air throughout your home, throughout the year.

Efficiency Controls the amount of outdoor air entering your home, never allowing any more than what's needed.

Feature	How It Works	How It Helps
Motorized Damper (connects to outside wall)	Works like a valve, automatically allowing or shutting off fresh air as needed.	Helps keep the air inside your home fresh, cleaner and comfortable***
24-Hour Timer	Manages the quantity of air entering your home, providing ventilation only when you need it.	Helps control energy costs.
Electronic Controller	Helps manage indoor air quality by responding to outdoor temperatures and indoor humidity levels.	Balances temperature and humidity for improved indoor comfort and air quality.
User Controls	Allows you to manage air exchange and circulation based on your individual needs.	Offers greater flexibility and comfort.

***Depending on the outside air quality.
